+ EXPERIENCES

Software Engineer - Networking - Backend Engineer
- Insurance - Devops Engineer

+ PROJECTS

Opensource Project - Jxnet

Jxnet is a Java library for capturing and sending custom network packet buffers with no copies. Jxnet wraps a native packet capture library (libpcap/npcap) via JNI (Java Native Interface).

- Jxpacket

Jxpacket is a Java library for crafting network packet and send them to the real network with Jxnet.

- Java Common

Java utils, buffer, tuples, etc.

- Security tools

Slowloris, MITM, Cryptography, etc is available on my github: @ardikars.

Non Opensource Project - Backend service for insurance company.

- Backend service for goverment owned corporation.
- Setup infrastructure for development team.

+ LANGUAGES

Mother tongue Bahasa Indo

Other languages Malay, English

+ IT PROFESSIONAL SKILLS

Operating systems UN*X system

System development C, Java, Python, etc

Networking OpenWRT

+ Activity

Engineering activity Doing research about panama project (java feature).
